WEB. APPLICATION DEV.

Website application development refers to the process of creating a website that includes interactive and dynamic features, beyond simple content display. This often involves using programming languages such as HTML, CSS, and JavaScript to create the front-end (user-facing) aspect of the website, and server-side languages such as PHP, Python, or Ruby to create the back-end (server-side) functionality. Popular web development frameworks include Ruby on Rails, Express.js, and Django. A website application may include features such as user accounts, databases, and the ability for users to interact with the website in various ways.

How we work on your Project?

Identify Current Site Issues

Review the current website and spot the elements that need fixing or changing.

Present Proposed Design

Conduct a team meeting and discuss the proposed design. Pinpoint all the elements that work and fix what doesn't.

Get Approvals

Present the proposed new website to the client and garner feedback and/or approvals.

Design Sprints Commence

Begin conducting design sprints to fix the website. This includes revisions and design revisions.

Begin Development

Once the UX/UI designs are approved, kickstart the development process.

Gather Feedback & Apply Changes

Conduct FGDs and client reviews to identify elements to alter. Edit the designs accordingly.

Optimize New Site

Ensure that the site is optimized for SEO. Make the site loading time
as fast possible and add keywords for ranking in search results.

Launch

After everything is approved, launch the site and inform all subscribers.

MISSION

To capture the large corporate houses and small business as well and serve their IT infrastructure.

VISION

To be a global force in making a better world through innovative IT solution

The SERVICES	We are into: Website & Apps Development, Salesforce/Odoo Integration, Cloud Hosting, Performance Marketing and consulting.
The Leadership	Dhiraj Verma and Mayank Kushwaha founded the company after working together at many multinational companies. They serve as CEO, CFO, and COO, respectively.
The Overall Industry	The IT industry consists of software development and mobile apps Development. This is perhaps one of the fastest growing industries in India and the world is looking at India with a greater hope.
The Competitors	Competitors include KNJ Label's mobile singing app and The Sound Academy's chain of karaoke bars. Aimsphere differentiates itself by focusing on casual gamers who prefer to sing with friends and family.
The Financial Status	The last balance sheet of the company **crossed $1.3M** in the financial year 2021 and this is about to cross $2.0M in the year 2022
Future Plans	By 2025, the company intends to extent their verticals in upcoming technologies like Machine learning, AI and IOT to capture the vast market and release the IPOs.

OUR JOURNEY

Excellency is in our blood since inception.

Year 2016-17

We seed Depex in 2014 but started officially since Jan2016 with merely 4 laptops, 5 staffs & an office and with a strong vision to excel in IT Industry. We started with services like: Website Development (following waterfall model) & Digital marketing,

Year 2017-18

Team grown to approx 25 with more machines , more customers & with a proven identity of excellency and few accolades. We added Mobile apps development (Native technology) and occupy a good American and middle-east.

Year 2018-19

Recognized as the Top 10 Flutters Apps developer in India with various certifications like: Top Mobile Apps developer, AdWords certified, Shopify certified and much more. By the time we reached approx. 60 Team size and a proven path record......................

Year 2019-20

This year was a golden year in DEPEX career. We got some large ticket size project with a series of Investors, and we developed some of the best apps which raised approx. $5 M and captured the huge gulf and Netherland market in terms of Food delivery, Education and Project management. We opened offices in USA (In partnership). We started other wings of Salesforce & Odoo integration along with own hosting team to meet some of the businesses IT needs.

Year 2020-21

We suffered a crisis during the covid-19 due to Pause of certain projects, but we never stopped, and our team won the battle by closing some educational apps, healthcare apps & Insurance driven software's. We captured good South African market. We started the new service to provide dedicated resources for remote IT staffing and helped a good number of company to hire some of the best brain around the industry.

Year 2021-22

We experienced the good rise of IT industry after the post COVID and we got some of the good closure and we added more service like: Digital Transformation, Big Data, AI/ML based development, wearable Apps development, Performance marketing etc. with the good fortune and proven record.

Our Global Footprint

We are headquartered at India with offices in two more geographical location: USA and South Africa. We have customers from India, Middle east, USA, Europe, South Africa & Australia.
